SITUATION SUMMARY

Major Exercises in the Region

Diablo Canyon Drill, San Luis Obispo County

- On 3/11/15 the Diablo Canyon Power Plant (DCPP) in San Luis Obispo County is conducting a drill from 0800 until 1300 hours. The drill includes only DCPP and limited dose assessment staff from local and state agencies in order to train, evaluate procedures, and identify areas for improvement. The SOC and REOC are not participating. There will be notifications from DCPP to the California State Warning Center, which will exercise the Nuclear Power Plant Standard Operating Procedures for sending notifications to Cal OES duty officers and other state agencies.

Weather of Concern

- No significant Weather Watches or Warnings are in effect.

Active Weather Warnings, Watches and Advisories by County: http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Dry weather and above normal interior temperatures will continue today, but an advancing frontal system will bring chances for light to moderate rain late tonight through late tomorrow. Dry weather will return early Thursday and last through the end of the week.

Medford Weather:

High clouds streaming over the area today are likely to limit warming but temperatures will still be above normal. Clouds will thicken this evening and overnight to bring some measurable precipitation in showers, mostly across higher terrains. Snow levels will be generally near 7500 feet until Wednesday, when they will dip to 6000 feet to 7000 feet in showers as cooler air moves in aloft. Storm total precipitation through Wednesday night is expected to be 0.25" to 0.50" in southerly flow favored areas and in the mountains, and 0.10" to 0.20" for most inland valleys.

Reno Weather:

High pressure over the West will bring warm and dry conditions through today. Low pressure will move over Northern California and Nevada late tonight through Wednesday night bringing light rain and higher elevation snow. Dry and warm conditions will return by the end of the week.

San Francisco Weather:

Low clouds and patchy fog can be expected this morning for communities along the bays plus inland bay valleys. Showers will be a possibility late tonight through Wednesday evening as a cold front moves through the area. Rainfall amounts will generally be less than quarter of an inch.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Increasing clouds today as a Pacific storm approaches. The storm moves through the forecast area tonight through late Wednesday bringing some light precipitation and cooler temperatures. Drier and warmer weather returns Thursday and Friday.

Hanford Weather:

High pressure will continue to reside over the West Coast today resulting in further warming and dry weather. A weak storm will impact the region on Wednesday bringing a slight chance of rain to the Central Valley and a better chance of precipitation to the mountains.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Stratus and fog will impact the coastal areas this morning. This afternoon through Wednesday, partly to mostly cloudy skies will prevail with the chance of some light rain on Wednesday, mainly north of Point Conception. For Thursday through the weekend, high pressure aloft and offshore flow will dominate leading to record or near-record temperatures this weekend.

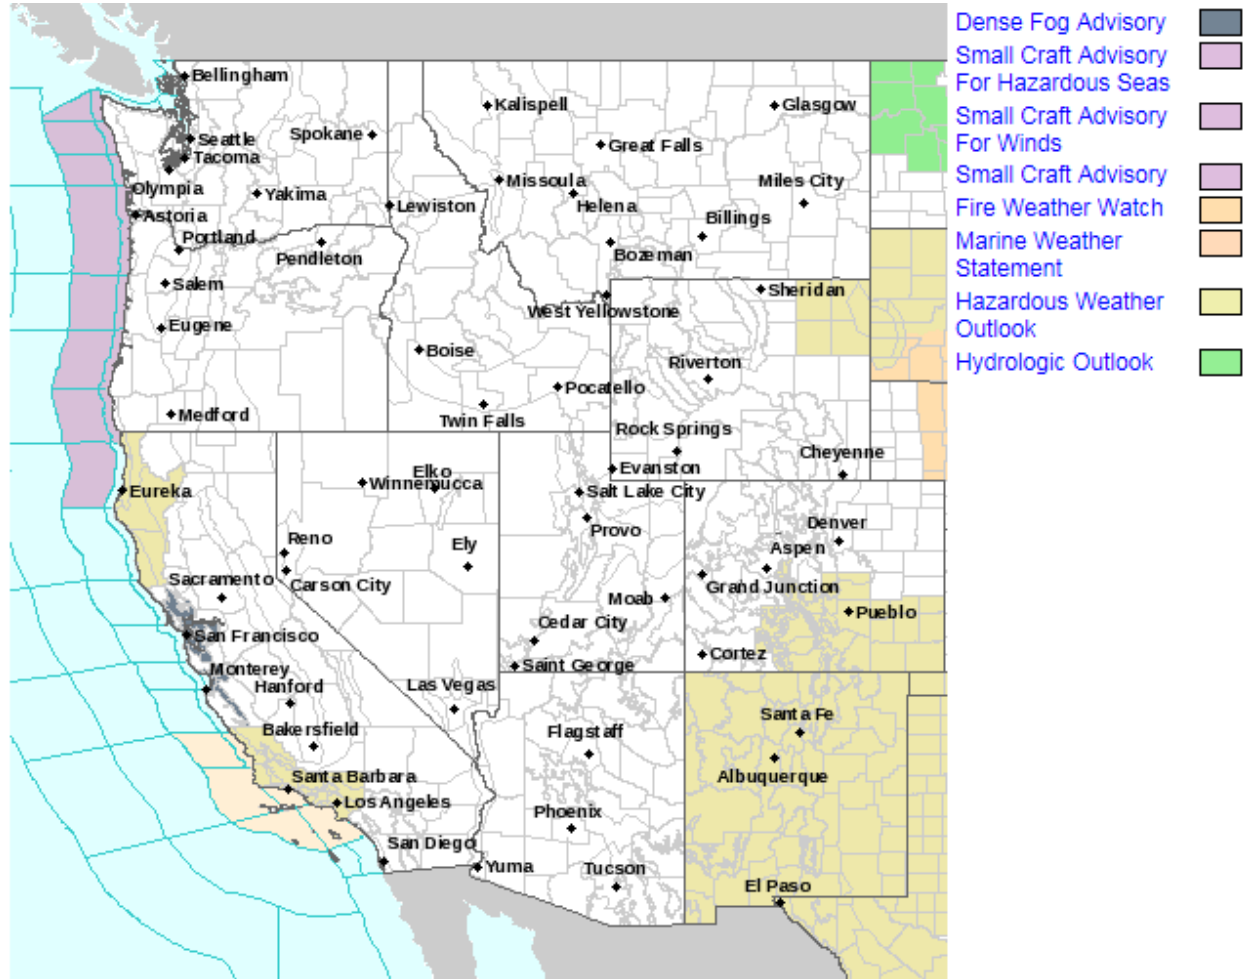

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Areas of night and morning coastal low clouds and fog will continue through Thursday morning. Weak offshore flow will bring slight inland warming today. For Wednesday, a low pressure system moving by to the north will bring cooling and more clouds. A return of high pressure aloft and weak offshore flow will bring a warming trend for Thursday into next weekend along with locally gusty northeast winds near the coastal foothills. High temperatures will be well above average for Friday through the weekend.

Southeast California Weather:

Well above normal temperatures continue through Wednesday as desert highs run in the mid to upper 80s. This will be followed by some minor cooling Thursday into Friday as a weather disturbance moves through. Temperatures rebound over the weekend with lower elevations seeing highs in the upper 80s to low 90s.

RECOVERY ACTIVITIES

Round Fire, Inyo and Mono Counties

- On 03/03/15, Recovery Individual Assistance (IA) staff conducted a joint County, Cal OES IA, and U.S. Small Business Administration Preliminary Damage Assessment. The damage assessment revealed at least 25 homes and/or businesses have uninsured losses of at least 40 percent of their value. Cal OES submitted a letter on behalf of Mono County to SBA requesting approval of a disaster declaration.
- The American Red Cross and Salvation Army continue to offer their support services.
- [Recovery Debris Management Coordinator deployed to Mono County for debris management group meeting and site walk-through.](#)

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC, Inland, Coastal, and Southern REOCs and the Santa Barbara County EOC are activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued an Executive Order on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought. Specifically, through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate a [monthly](#) state interagency conference call regarding drought community impacts.
- Cal OES Regional (Inland, Coastal, Southern) conference calls will occur once a month beginning 02/09/15.
- Cal OES Region/Recovery Call frequencies will change on and as needed basis.

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
